

Summary

- ◆ The NCMR has been functioning at an outstanding level for the past two and one-half years.
- ◆ NCMR Fluids and Combustion scientists have successfully competed for NRA research, significantly supported other principal investigators, published extensively and presented world-wide.
- ◆ Lecture Series in Fluid Physics and Transport Phenomena and Combustion Science have been very successful. World class lectures presented to a broad range of academic, government and industrial participants.
- ◆ Microgravity Fluids or Combustion Workshops hosted every year.
- ◆ K-12 program is making major contributions and has grown considerably.
- ◆ Industrial Outreach Program has been successfully implemented. Major Workshops/focus groups/tiger teams are planned.
- ◆ Research for Design Project (R4D) has the potential for major technical impact on NASA Human/Robotics Exploration Program.
